## Experience

### Washington State Department of Social and Health Services

Olympia, WA (Remote)

FULL STACK DEVELOPER

May. 2019 - PRESENT

- Developer on the CARE modernization team where we're taking an outdated case management system used to assess 75,000+ citizens and converting it into a progressive web app (PWA) using Angular 12, Java, Spring and SQL.
- Responsible for maintaining and developing custom Angular components for WEBUI, our private frontend framework that's used across multiple internal applications such as CARE, TIVA2, STARS and ASAP. Also responsible for updating, deploying, and publishing WEBUI to our internal npm repo using Jenkins.
- In this role I also act as the primary UI/UX designer and developer. I am heavily involved in all major design decisions and I regularly meet with business, users and development teams to determine the best design solutions for our application. As part of our design process I create mock ups and wireframes using Balsamiq and functional prototypes using Angular, HTML, SCSS and Bootstrap.
- Participated in interviewing UI/UX consultants for the new Washington state WA Cares project as well as a key interviewer for Frontend developers and UX/UI Web Designers for existing DSHS applications.
- TypeScript, Angular 12, RXJS, Java, Spring, SQL, Jenkins, Azure, Git, Jira, Bootstrap, SCSS, Balsamiq

### Ceasars Entertainment

Las Vegas, NV

FULL STACK AEM DEVELOPER

Jul. 2017 - May. 2019

- Developed a modern UI using CSS Grid, Flexbox, JavaScript and Adobe AEM Screens to provide patrons at The Linq Hotel and Casino live up to date stats, betting odds and leaderboards.
- Developed AEM 6.4 components for the Caesars Entertainment enterprise homepage with React, TypeScript, HTL, Bootstrap and Less. Additionally, used Java to create component models to retrieve data from CRXDE.
- Built new AEM components for two major site redesign projects using TypeScript, jQuery, Less with BEM methodologies and Kotlin to handle data and render HTML with Kotlinx DSL.
- Responsible for creating end user components for Caesars Entertainment's 50+ enterprise websites using Adobe Experience Manager.
- Aided in migrating AEM 5.6 to AEM 6.2 which involved converting JSP files to Kotlin, JavaScript files to TypeScript and dialogs from Classic UI to Touch UI.
- Diagnosed and remedied technical debt resolving over 700 linter errors, which helped improve build time and performance. Reducing Kotlin lint by 45% and CSS lint by 33%.
- Adobe Experience Manager (AEM), React, TypeScript, JavaScript, Java/Kotlin, Sightly/HTL, JCR, Git, Less, jQuery

### Independent Freelance

Las Vegas, NV

WEB DEVELOPER

Dec. 2016 - Jul. 2017

- Used GatsbyJS and Styled Components to develop a site which consumed a Wunderground weather station API to display conditions for Willie McCool park and flying field.
- Created static sites using HTML, Bootstrap, CSS, JavaScript and jQuery for a handyman and hair stylist that were hosted with Github Pages.
- Migrated an outdated basketball camp site over to a modern WordPress theme. Applied custom styles with CSS and implemented an EventBrite API feed for ticket sales.
- Built an Amazon ecommerce affiliate site and blog with WordPress. Linking a 100+ products, and installing plugins for forms and analytics to track visits and sales.
- Installed a WordPress theme for a mobile car detailer and adjusted styles base off of clients requests using CSS.
- WordPress, GatsbyJS, React, HTML, CSS, Bootstrap, JavaScript, jQuery, Less/Sass
